CHAIRS

## CREEPY. WOODY. CRAFT.

Allow me, fester, gomez, little tully, lumpy, flora, morticia and eddy ... right, this lovely family of chairs is related to the notorious Addams Family. More than that, they stem from Transylvania. Master artisan Vasilica Isăcescu and Nadja Zerunian of co/rizom created these "little monsters". Their goal is rather innocent: To create authentic, fair and sustainable products from mother nature.

**CARE INSTRUCTIONS**

Regular cleaning and maintenance is important in order to keep your pulpo product looking its best and to prolong its life. Always remove any kind of dirt as soon as possible. We recommend that you first test a small, invisible area to ensure that no colour change or damage arises to the product. Do not use materials for maintenance that contain abrasive agents or are basic, acid or organic.

**WOOD CLEANING**

Wipe down your wood furniture with a barely damp microfiber cloth to remove dust and grime. You never want water to sit on the wood, so quickly wipe it down with another dry microfiber cloth. For regular dusting, a quick wipe-down with a microfiber cloth will do the trick.
